SAKE

Steeped in mystery and tradition, the origins of Sake date back to 300 A.D. In Ancient Japan, Sake was primarily made in the Imperial Court and large temples and shrines. The Japanese have held Sake in extremely high regard since ancient times.

For centuries Sake was brewed in cedar tanks and stored in cedar casks giving it a woody flavor and aroma. Technology and the careful selection of the best suited rice and water has contributed to the more elegant, refined, fragrant and delicate tasting Sake that exists today.

Just as the flavour and aroma of Sake has changed over the years, so has the attitude towards serving Sake. Originally Sake was served warm. This was done to mask any imperfections resulting from the very primitive brewing process. Modern Sake is complex, delicate and best served just under room temperature or slightly chilled. This is not to say that Sake should never be warmed though. Sake, like wine, varies in taste at different temperatures. It is merely a matter of personal preference.

Half Bottle

Recommended warm or cold

Kiku-Masamune Tokusen Junmai	1300
